Volume 24 THE REDCLIFF REVIEW THURSDAY, AUG. 8th 1935 Number 40

## Liberal Meeting Held Here Last Friday

Was Held in The Interests of Mr. Hector Lang

That Social Credit as advocated by Mr. Abernethy is definite, impracticable and unconstitutional and could not be worked out, and that Mr. Abernethy was just fooling the people, was the summing up of Mr. Edmondson, of Calgary, in his address in the I.O.O.F. hall last Friday evening in the interests of Hector Lang, Liberal candidate in this constituency.

Dr. McLeod, who accompanied Mr. Edmondson, solicited support for Mr. Lang who, a member for the past eight years, had been untiring in his efforts to serve his constituents no matter with what party they had been affiliated. He referred to the integrity and sincerity of Mr. Lang and said he was well qualified to give this constituency the best possible service.

Mr. Edmondson claimed this was the most important election in the history of the province as some of the questions now before the people involved national and in some cases international problems. He reviewed the platform of the Liberal party and claimed that it provided for real workable Social Credit but not the kind advocated by Abernethy.

Mr. Edmondson thought all should ask themselves the question: "Whither are we drifting?" and claimed the main issue was money, money and money, and advised all to vote for the party that would best solve their problems.

## A Musical Film That's The Top

Jeannette McDonald Nelson Leads in "Naughty Marietta"

Jeannette McDonald, heroine of "The Merry Widow" and "No. 13 Eddie," is the star of a delightful blend of drama, romance and music in "Naughty Marietta," Metro Goldwyn Mayer's translation of the Victor Herbert translation of the Victor Herbert masterpiece, which opens today at the Empress theatre. Retaining the gorgeous music of the operetta, the picture is produced as a thundering drama of New Orleans of the 1820s, with the famous "Marriage Auction" the savage battles between troops and pirates, the importation of the Casquette Girls and other vivid details. Settings and costumes are gorgeous, and St. Louis of the period and its people being reproduced on a lavish scale.

## "Les Miserables" New Screen Drama

March, Laughton Chief Actors in Famed Men-Hunt

Fredric March and Charles Laughton play fugitive and police in the most elaborate of all national man-hunts in Darryl Zanuck's 20th century production of Victor Hugo's "Les Miserables," which begins a 4 day run at the Empress Theatre on Aug. 14th. March is seen as Hugo's Jean Valjean, young hero, Jean Valjean.

## High School Pupils Make Good Showing

100% Pass by Pupils. Told of Principals Lectures

Result of the department examinations are out and students from Redcliff high school made a splendid showing. At the fourth year in succession 100% of the pupils taking lectures in the principal's room were successful in passing in all their subjects.

The highest mark obtained by a Redcliff student was 94.7. This was achieved by Robert Law in History of English Literature. He was closely followed by Reginald Rose with 93% in the same subject. Several other students obtained over 90%.

The only failures reported in this year are two candidates in physics 2 and six candidates in art 1.

## Fine Mouse Head In Legion Club

Was Shot By Go. Ordway Last Winter

Decorating the walls of the local Legion club rooms is a fine specimen of a mouse head newly mounted. The mouse was shot by Mr. Ordway when out on a morning trip last fall. The caters measure 4 feet 5 inches long and have 10 points on one side and 11 on the other.

The head is being much admired by old hunters and naturally George is quite proud of its trophy. He had quite an experience getting the monster out of the woods. Several of his friends had a toothsome taste of mouse meat on his return home.

## Churches

### ST. MARY'S CHURCH

Mass will be celebrated on the 3rd Sunday of each month at 8:30 a.m.

### ST. AMBROSE CHURCH

Rev. H. S. Hannett, Vicar. 7:30 Evensong.

### JORDON MEMORIAL UNITED CHURCH

Pastor: Rev. H. Reakine-Pow Sunday, August 4th, 1935 10 a.m. Church School.

11:15 a.m. Morning Worship Subject: "Our ground of belief in the resurrection of the dead" 7:30 p.m. Evening Worship Subject: "A man is right if he believes he is, and acts up to his convictions"

## "Les Miserables"

The Love of Christ, springing from heart to heart, from man to man, is a cure for all the ills of society."

Man, who spends five billion years on a French prison ship for stealing a loaf of bread and then becomes a fugitive from justice by violating his parole. Laughton is Javert, the fanatical detective, whose devotion to the letter of the law drives him ruthlessly along the reformer's complete trail.

## J. Bullivant Will Address Meeting Here

In I.O.O.F. Hall Next Wednesday, August 14th

Mr. J. Bullivant, Mayor of Medicine Hat and Conservative candidate in this constituency for the approaching provincial election, will address a public meeting in I.O.O.F. hall here next Wednesday evening, August 14th commencing at 8 o'clock. Mr. Bullivant will discuss the questions pertaining to provincial affairs. He will be accompanied by other speakers. Everybody invited to attend.

## Canada on Top of Export Trade

Indications That Trade Conditions Getting Better

Canada led the way over other countries during the first months of this year in exports of many of her products to the United Kingdom, further indication that trade conditions are continually getting better. The commodities with which Canada topped the list were wheat, oil, furs, tobacco, copper and lead, crude silk, non-ferrous metals.

Figures from the Dominion Bureau of Statistics show that leading first place in sales of wheat to the United Kingdom Canada sent over 16,214,202 hundredweight in the first six months of 1935. As against the second, Australia third and Rumania fourth. The Dominion was first in wheat flour with 1,546,346 hundredweight; Australia second, France third and Italy fourth.

The Dominion was not far behind other countries in some of her other commodities. Wheat was second in cattle, bacon, hams, wool and timber.

In another phase of Canadian business—bank loans—early summer business actively was reflected in an increase in volume of loans for the month of June. The monthly statement of chartered banks issued by the Department of Finance showed call loans up \$3,500,000 compared with the month of May, current loans up \$7,000,000 current loans outside Canada up \$8,600,000. Note circulation was up \$7,000,000.

Mr. Jack Hope was being congratulated on all sides last Monday on reaching his empty-until birthday. Jack says he is expecting his wisdom teeth any time now.

## How to Mark Ballots In Coming Election

Single Transferable Ballot To Be Used

There appears to be some uncertainty in the minds of some electors as to how the ballot should be marked in the approaching provincial election.

The ballot to be used is called the Single Transferable Ballot, which means that the voters mark their choice by using the figures 1, 2, 3, and so on according to the order in which they prefer the various candidates.

As the object of the single transferable vote is to give electors an opportunity to have two or three chances of saying who they want to represent them, all should mark their ballot out in full. For instance, you mark "1" opposite the name of your first choice, "2" opposite your second choice, "3" opposite your third choice and so on according to the number of candidates in the field.

In counting the ballots if any one candidate has a clear majority of first choices over all others combined, his is declared elected. In case no candidate has a clear majority, the one having the least number of votes is eliminated, and his second choice votes are added to the others according to the way they are marked.

In no case is an "X" to be used in marking the ballot. They must be marked with the figures 1, 2, 3, and so on if necessary. However it is permissible to vote just 1, or 1, 2, 3, 4, 5, the object of the transferable vote is to give your franchise to the limit.

## (COMMUNICATION)

Redcliff, Aug. 6th, 1935 Editor Redcliff Review,

Dear Sir: When I got my Review last week I was casually looking over the news items when I ran across an item where the school board had made an appointment in place of Miss Cox. Imagine my surprise when I saw that the Board had ignored the six local applicants, those from our town, and appointed an outsider. Surely some of these six must have been qualified, if not what's wrong with our school? They have all been educated here in Redcliff.

From my own knowledge of the school and the students, I compare very favorably with any place in the province and I cannot see any reason to justify the action of the School Board.

We have had as head teachers Miss Johnson, Miss Hicks, Miss Cox, Miss Edithson and Miss Moore, all as far as I am concerned, completed their education here. And as far as it has come to my knowledge there have been no complaints. Then why discriminate now? Surely the taxpayers would want some explanation from the Board.

Yours for a square deal Tax Payer

The fifth man connected with the kidnapping of John Labatt, the London brewer, was arrested Monday. He is Gerald Nicholson. One man serving 25 years for his part in the crime, another has pleaded guilty and three more are yet to stand trial.

## Work Under Way In The Drouth Area

Applications Still Coming in For Reserving Water

Work has already commenced in the drouth rehabilitation program in the prairie provinces under the Dominion department of Agriculture.

Applications are still being made from farmers and ranchers and ranchers all over the west also from communities in response to the government offer of free engineering and a cash grant of three cents per cubic yard of dirt employed in the projects approved. Approximately 4,600 applications have been filed in Swift Current. This includes several hundred filed at the Medicine Hat office while headquarters were there.

C. M. Moore whose office is in the post office building in Medicine Hat is engineer for this district.

Don Robt. Weir announced this work will be rushed through as quickly as possible.

## Elements Helping Solve Wheat Surplus

Much Damage Done by Rust and Drouth

The spring wheat crops in both the United States and Canada have suffered heavily from drouth, hail, rust and hot winds. Estimates of loss in the U.S. spring wheat belt vary from 60,000,000 to 135,000,000 bushels (the original estimate of 275,000,000).

Canada is experiencing continued dry weather with hot winds of the prairie provinces in the southwestern portion of the rust has been prevalent in a form Saskatchewan and Manitoba. Some 20% of the seedlings of Manitoba and Saskatchewan is shown to be seriously injured with rust, 3,600,000 acres in eastern Saskatchewan and 1,500,000 in Manitoba. Owing to the lateness of the Saskatchewan crop increased infection of rust may enlarge the damage here it is feared.

The southern hemisphere is suffering from drouth, too. About 50% of the Argentine wheat zone has been affected and rainfall is badly needed for the newly seeded area and to complete sowing in other parts.

## Moore Furniture Co. Renovating Store

Front Show Windows Being Greatly Enlarged

The large furniture store of J.J. Moore and Son in Medicine Hat is undergoing remodelling and renovating at present. The front windows are being greatly enlarged and will have a "back ground" of the very latest in plastic decorations.

The interior is also being altered to provide better space for the display of the large stock carried by this firm and the four stories are being redecorated throughout.

St. Ambrose Church will hold their annual picnic at Central Park, Medicine Hat on Wednesday next.

## Band Will Give Concert Next Sunday

Will Be Held in St. Ambrose Church Grounds

Redcliff Jubilee Band will give a band concert on St. Ambrose Church grounds on Sunday evening next at nine o'clock. The following will be the program:

- O' Canada
- March—S.B.A.—R.B. Hall
- Couverture—Inter State—G. Southwell
- Selection—Old Ireland—G. Southwell
- March—Double Eagle—J.F. Wagner
- Selection—Operatic Mingle—F.W. Berry
- Waltz—Camperla—G. Southwell
- March—New Colonial—R.B. Hall
- Selection—Sacred Songs—God Save The King

During the evening a collection will be taken up to help purchase new music and instruments.

The band is making splendid progress and should be encouraged by our townpeople. It is hoped there will be a good attendance and also a substantial collection.

## Local Golfer Gets A Novel Present

Was Doubted To Mr. Baird For Making A Hole In One

A few weeks ago Mr. Frank Baird made a hole-in-one at the golf course in Medicine Hat. As this is a very uncommon event which requires much skill, Mr. Baird was presented with a very novel desk ink stand by the firm which makes the golf balls used by Mr. Baird on that occasion.

The stand is set on an ebony base with the business end of a golf club which serves as a holder for the pen and the ball used by Mr. Baird fastened on one corner of the stand. The stand is a very attractive one and is much prized by Frank.

## Raft and Bernies Lads Star in Melodic Music

At Empress Theatre Commencing Next Monday

A tip to Bernie fans! Turn off your radio and go down to the Empress Theatre where you can see the old maestro himself in Paramount's "Stolen Harmony." It will afford you as much enjoyment as a month of listening to him. And even if you are not a Bernie fan, you will be converted.

Stared with Go. Raft in a film that is an adroit blend of comedy, melody and drama, Ben Bernie and his lads romp along with a brand new Gordon and Revel song, scattering laughs and thrills every foot of the way. "Stolen Harmony" presents the maestro in a role where he can act himself. He is the leader of a troupe harlequinizing through the stage in an enormous hall.

Mr. and Mrs. J. Allenback are at present visiting friends at Danell, Sask.

## Agriculture In School

An almost perennial subject of discussion is the school curriculum. What it should and what it should not contain. Many there are who contend that the present-day curriculum in most countries is over-loaded with subjects and contains much that should not be there. There are others, including numerous organizations, who are constantly demanding that this or that new subject be added. For example, there are those who strongly advocate the teaching of temperance, not so much in the wider meaning of this term, but in direct relation to the use of intoxicants. Others insist that religion should be taught, while others again object over recitation of the Lord's Prayer or the Ten Commandments. Still others call for the teaching of co-operation, the meaning and use of money, while the teaching of so-called social subjects and problems which different groups insist should be included in the curriculum are almost beyond calculation.

The real difficulty seems to lie in the opposing views as to what to teach, and what is the function of the school in providing it to the youth of the land. Is it the main function of the school to impart information, or is it to develop and train the mind and intellectual powers of the student as to equip him or her for the battle of life, the struggle of the sphere in which they may live or the particular activity in which they may be engaged? If the former, then a very extensive curriculum would be necessary to cater to all classes of students; if the latter, a fairly short and condensed curriculum might serve all.

There is one subject, however, apart from the rudimentary subjects such as reading, writing, arithmetic, geography, history, composition, etc., which it has been generally recognized should, to the full extent possible, be included in our school courses, and especially so in the western provinces of Canada, and that is, agriculture. Addressing the recent annual convention of the Canadian Society of Technical Agriculture assembled at Edmonton, Dr. H. C. Wallace, president of the University of Alberta, discussed this particular aspect of present-day curricula in the schools. Having stated that a good deal of thought has been given in past years to the kind of education in agriculture which can best be introduced into the school curriculum, Dr. Wallace said that it had to be frankly admitted that relatively little success had attended the efforts of those who are concerned with school education in the teaching of agriculture; that the formal agriculture of Grade IX, and X, of the high school had on the whole not achieved what was expected of it; and that the school garden, so enthusiastically proclaimed thirty years ago, cannot be seen in Western Canada to-day.

While stating that it would necessarily be an accident and not the art of the underlying difficulties—lack of trained teachers, discontinuity of school life during the growing season, etc.—Dr. Wallace said it had been learned that in public and high schools, where the school was of the opinion that successful work in agriculture in the public and high school will come incidentally to the study of natural science. If the applications of the principles of science were continuously made in plant and animal processes, in weather lore, and in soil processes, interest in agriculture and in agricultural procedure would grow naturally out of the underlying scientific principles which have universal application; and the teacher would not be placed in the compromising position of posing, unwillingly, as an expert in a field where he or she was not accepted. That would be, he felt, the emphasis of the future.

On the other hand, Dr. Wallace pointed out, there had been real success in boys' and girls' club work, and in school fairs in which agricultural projects had played their part, mainly because the activities were extra-curricular and conducted in the realistic atmosphere of the help of trained district agriculturists. In so far as these projects were honestly carried out by the young people themselves, they were the soundest accomplishment of school-age boys and girls. The unfortunate fact was that the school system, as yet, did not reach all schools and school children in the rural districts.

These observations by Dr. Wallace would seem to merit the serious consideration, not alone of Provincial departments of education and agriculture, but of the parents of farm boys and girls who are themselves the trustees of rural schools and directors of agricultural societies. Dr. Wallace places stress on those scientific truths which are fundamental, which must be recognized and obeyed if success is to be achieved. These can be learned in school through the natural science course, even though such courses may not be distinctly labelled agriculture. Successful agriculture cannot be learned wholly from a book, or through a study course, any more than can carpentering or any other vocation. But if pupils are sent out from the schools well grounded in the scientific principles, and acquainted with the immutability of Nature's laws, with intellects trained to observation, to the detection of the true from the false, imbued with initiative and ambition, they will be primarily equipped for a career in agriculture or in any profession they may choose.

## Flying Fish

Flying fish do not fly. They do not flap their "wings," but merely glide through the air. After getting up speed in the water, the fish takes to the air, and "wings" current and momentum do the rest. Considerable speed is attained and a distance of 500 feet is often covered by these

fish. Although he said only a few hundred feet from the bank, a fish glider at a musical festival in Ontario, heard the musicians from a distance of more than 500 feet. Unable to hear the band concert from where he was sitting, the man turned on his car radio and picked up the program from Chicago. 3208

## Lives Life In The Arctic

Quebec Girl Spends Two Years In The North, And Is Doing Back Again

Cities have no attraction for Marie Ornat, 20-year-old Quebec girl. She found city life "empty" when she visited Montreal after two years at Cameron Bay, a mining settlement on Great Bear Lake, near the Arctic circle.

Marie spent a few days with her sister at Montreal, then left for her home in Quebec. Late in the summer she expects to marry a young mining engineer, a graduate of Queen's, now in the Athabasca district, and return to the north to live.

In the summer of 1933 Marie, then 18 and fresh from the sheltered life of a convent, set out from Quebec for Cameron Bay to visit her brother whom she had not seen for eight years. Travelling by rail to Peace River she joined a party taking supplies. Then began a hazardous journey by boat through the Peace river, Lake Athabasca, Slave river, Great Slave lake and the Mackenzie and Great Bear rivers.

On the party reached Fort Franklin, 250 miles from their destination, Sept. 1, the water was freezing fast, and there was no hope of navigating Great Bear Lake that season. A plane was chartered to complete the trip, and Marie had her first experience of flying.

Trips by airplane to visit sister and pitchblende mines in the vicinity were among her later experiences. It was some time, however, before she was permitted to go down into the mines. The miners were superstitious about women in the workings.

At Cameron Bay, where Marie was one of eight white women, she had plenty of time to observe the life and customs of the Indians and Eskimos. She preferred the latter, she said, because they were cleaner in their habits than the Indians. Eskimos, when on Eskimo offered her wife and two daughters in exchange for a fine rifle which he coveted. Stealing another man's wife, however, is a serious crime, for in the Eskimo idea of justice, death is the punishment.

## Gulls Fond Of Cherries

Have Their Own Method Of Securing The Fruit

A remarkable case of birds meeting a new situation by a change in their characteristic behavior has just been reported to the U.S. Biological Survey. The birds are the gulls at Salt Lake Valley of Utah. They are fond of cherries. Great cherry orchards have sprung up through the region in the last few decades. The gulls go to the orchards, the cherry trees, without perch on the branches and help itself to cherries. It must wait for the fruit to fall which doesn't happen in the great commercial orchards. So the gulls have learned to hover over the trees and then fly to the ground and feast on their harvest. They also have learned to sit on the branches of the cherry trees supporting themselves with outstretched wings and devouring all the fruit within reach.

The new food habit says Clarence Cottam, food-habits expert of the Biological Survey, seems to have developed as a result of a locally increased gull population and the consequent greater competition for the limited supply of usual foods.

## Cheered Wrong Man

Lloyd George has a "double" in James Gray, a 1921, in Glasgow. This the former prime minister learned when he recently appeared before an audience of 3,000 in Glasgow to tell about his New Deal proposals. Gray arrived at the hall first, was mistaken for Lloyd George, and received round after round of cheers. When Lloyd George arrived much of the lung power had been spent.

## The Lunar Eclipse

A lunar eclipse is caused by the shadow of the earth, sun, and moon, with the moon passing through the umbra cone, stretching about 800,000 miles into space. The long duration of the last eclipse—1 hour 40 minutes and 18 seconds—was caused by the moon's passing through a thick portion of the cone approximately 220,000 miles away from the earth.

## NATURE'S MINERAL SALTS

Choose the power—mineral salts—of the world's most famous health food. SASKASAL

## South Africa Celebrates

New British Dominion Was Formed 35 Years Ago

In the battle period of the King's silver jubilee another has been overlooked, that of the Union of South Africa. It was in the summer of 1910 that the former four republics of the Transvaal and the Orange Free State joined with "The Cape" and Natal to form another British dominion overseas.

The Boer War had ended some nine years previously, and thanks to the generous terms they were given greater freedom than they even had under old "Oom" Paul Kruger. There were, and probably are still among the older Afrikaners, a few reactionists, but the great majority are, if not ardent Britishers, South African first, and English second—which is, about the situation in Canada—Canadian first, then loyal Britishers. Their loyalty was put to a severe test four years after the Union when the Great War broke out and Germany in South-West Africa attempted to foment an anti-British rising. A small number did make themselves troublesome, but Boer and British, combined to crush the German forces and soon the end to Germanism in South Africa.

There is no sturdier Britisher in the Empire than the Boer, a few general, Jan Smuts, who has one of the finest minds in the world, and General Hertzog, the prime minister, has also become a firm friend of Britain. "South Africa has a white population of about two millions, 50 per cent. Dutch and 40 per cent. British. The country is very prosperous chiefly owing to its vast gold belt, and it can look forward to the future with confidence."—Thomas Times-Journal.

## Has Lived On Farm

Canada's Second Woman Senator Eight Years In Saskatchewan

Canada's new woman senator, known first-hand, life on a Saskatchewan farm. She is Mrs. Howard Fells, and she was recently elected to the senate.

Mrs. Fells, in the days gone by, once lived for eight years on a farm in Saskatchewan, according to word of the east.

An eloquent and public spirited wife of a Peterborough, Ontario, farmer, Mrs. Fells has a long distinction of being the second woman member of the Canadian senate. She is the last of her sex to be elected in Canada's parliament, and the only woman on the government side of the red chamber.

At the close of Mrs. Iva Campbell Fells' address from the list of 10 senators named by Prime Minister R. B. Bennett, the senator-elect, Mrs. Fells, said that she was the heavy duties of farm life with that of an eloquent parliament speaker.

She spoke of her early life with the judicial committee of the privy council had decided in Canada women were "persons" and entitled to all the prerogatives enjoyed by men in respect to government, the then prime minister, W. L. Mackenzie King, summoned Mrs. Fells to Ottawa, to the senate. She was the first woman senator, and the second woman to become a member of Canada's parliament.

Long before that, in 1921, Mrs. Agnes Macphail, a Grey, county farmer's daughter, was elected to the House of Commons for Southeast Grey, Ont. She was the first of her sex to take a seat in the House of Commons and has been returned at every general election since.

## Damage Has Been Repaired

Last Evidence Of Zeppelin Have Disappeared From London

Last visible evidence of the havoc wrought on London and suburbs by World War Zeppelins has disappeared. A wide block near Ely-place, in Camberwell, where three houses were blown to pieces in a 1917 air raid, has been cleared for rows of modern buildings. It was supposed to be the last remaining ruin of any consequence. The base of Cleopatra's Needle on Victoria Embankment, only a few blocks from the Houses of Parliament is heavily pockmarked.

To rub anything through a sieve, always use a wooden spoon in preference to a metal one.

A back town is where most of the big shots in the city who have made good came from.

## FASHION FANCIES

**303**

**SUCH CHILDLIKE CHIC — EASY TO WEAR — SO SIMPLE TO MAKE AND AT MODERATE PRICES**

By Ellen Worth

Here's a darling little coat, and hat ensemble, for tiny tots, so to wear—and smart.

The coat buttons snugly at the neck, and has a double row of buttons, affords ample chest protection.

In soft Open-blue diagonal worsted, it was lined with a wool silk crepe mixture.

For more severe weather, a lovely idea is to use a quilted effect worsted, or a dark blue material for hat and coat with 1 1/2 yards of 54-inch material for hat and coat with 1 1/2 yards of 54-inch lining and 1/2 yard of 12-inch interfacing for hat. Pattern includes hat and coat.

Pattern is cut. Address mail order cut to Pattern Department, Winipeg Newspaper Union, 170 McLeod St., Wm. Winipeg.

Summer Fashion Book contains many more smart, cool vacation clothes. Send for your copy to-day the price is 25 cents.

Returns of the production of returned cheese in Canada were collected in the Dominion Bureau of Statistics for the first time in 1924. Total production in that year amounted to 14,893,284 pounds. Since 1920, when 25,602,569 pounds were produced, production has declined, dropping to 10,839,924 pounds in 1928. Production in 1929 amounted to 12,800,000 pounds, an increase over 1933 of 1,361,254 pounds, or 13 per cent.

## Looking For Frost

Hendrick Willem Van Loon, noted Dutch-American historian and traveler, who recently commenced a radio program in New York, as a boy of 11 in Rotterdam spent three days watching a statue of Erasmus to see if the famous figure really did turn a page of the book every hour, as the legend said.

Butler and where is your sister, Jimmy?

Jimmy—She just ran upstairs to change rings when she saw you coming.

## Health Of The World

Population Of Most Countries Retains Good Health During Years Of Depression

According to the data supplied by the League of Nations Year Book, it looks as though mankind not only could take the depression, but waxed healthy under its vicissitudes. The death rate in all except three of the thirty countries reporting was less than the average in the prosperous five years 1926 to 1930. The birth rate average also fell, rising slightly in the last year in five of the countries, namely, Germany, Great Britain, Ireland, Poland and Denmark. Germany has long led in this regard, her population increasing 7.1 per 1,000, twice as fast as in 1933, and seven times faster than that of France, and more than twice as fast as that of Great Britain, where it was 1.3 last year. United States for 1933 was 5.7.

The League book does not touch upon the cases of mental illness, but a study made by the United States National Committee for Mental Disease and the American Psychiatric Association, asserts that mental ailments have shown no increase since the depression, a finding that is contrary to the general impression—Winipeg Free Press.

## Completes Long Trip

Dutch Submarine Travels From Holland To West Indies

The most ambitious trip ever undertaken in any submarine ended when The Netherlands Navy's K-18 arrived at Amsterdam from Surabaya, East India, having left Rotterdam, Holland, on November 14 last, covering a distance of more than 23,000 miles.

The submarine, under her own power and without an escort, visited five continents. The trip included Africa, twenty and twenty-five day stretches without a break. The submarine dived 230 times, remaining under water for 264 hours. The crew of 26 men was under Commander G. H. Hertzog, also aboard being Professor Felix A. Vening, of Utrecht University, charged with scientific observations. The latter made the deepest sounding ever made in the Atlantic, namely 8,700 metres between Dakar and Pernambuco.

The stockyards at Williams Lake, B.C., lie in the centre of a miniature empire, with the Cariboo country to the east and the Chilcotin country to the west. An idea of the size of this territory may be gauged from the fact that it takes three weeks to drive cattle to the stockyards from the more remote ranches, while the bulk of the cattle which come from the west of the Chilcotin river requires ten days to take the trip.

## WORLD HAPPENINGS BRIEFLY TOLD

Friends of the late Col. T. E. Lawrence—Lawrence of Arabia—announced the death of St. Paul's Cathedral had offered space there for a memorial to him.

Dr. E. Ross Hiss, of the Winnipeg Free Press, was the luncheon guest of the directors of the Liverpool Corn Trade Association on July 3 at Liverpool.

Notices inviting all negro men in Montreal aged 21 and over, in good physical condition, to register for service with the forces of Empire Haiti, of Ethiopia, have been posted throughout Montreal.

A loan of \$500,000 has just been authorized by the Dominion government to the province of Manitoba for re-lease to the city of Winnipeg to meet expenses of the city in connection with 1934 relief projects.

Sweden recently celebrated the 50th anniversary of the first Riksdag or parliament, the first recorded meeting being in 1435. Only the British and Icelandic parliaments are older than Sweden's.

First import of its kind through Montreal, anthracite coal from French Indo-China—a load of 8,000 tons carried in the Norwegian motorship Bonnevillie—arrived recently to be sold on the Canadian market.

Rear-Admiral Gerald Charles Dickens, a grandson of the famous novelist, was appointed commander-in-chief of the reserve fleet of the royal navy, in succession to Vice-Admiral Arthur-Tusillon, killed in a motorcar accident.

A crate of used books arrived at the entrance to the county jail. Just a bit of reading for the prisoners. The titles included: "A Book of Escape" by Evans Buchan; Canada's general-governor designate, and "Barons of Iron," by Ethel M. Dell.

## Returning To Japan

Charming Native Of Korea Spends Three Years Attending Canadian Schools

Soda Nawas, charming native of Korea, is returning to Japan after spending three years in Canada attending Canadian colleges. She plans to take back to her native land methods of western education. She taught school in Korea, later going to Japan, where she worked with Dr. P. G. Price, evangelist. On his advice she left for Canada, spending two years at Alma college, St. Thomas, Ont., before entering the training school. She plans to be a religious educationist in Tokyo.

In a Japanese kindergarten she loves to dance the interpretive dances of her people. She is an accomplished musician.

Miss Nawas is visiting in Edmonton as the guest of Miss Dorothy McNeil, with whom she attended United Church Missionary Training College in Toronto last year.

She said no English translation could do justice to Japanese poetry, which was written in two styles, one containing 31 beats, metrically divided, and the other only 17. Children in their earliest years are taught verse, and she wrote her first poem at the age of five. Japanese women were invading every field—even the police force, and were popular officers, she said.

## Restrictions For Newspapers

Vendors in Peking, China, Forbidden To Shut Headlines

Denouncing the kind of newsboys tended to spread alarm and uneasiness in that already nervous city, the Peking government has issued an order whereby all news-vendors are prohibited from shouting the headlines of their papers, but must limit themselves to merely saying the names of their publications.

Another reason for the new ruling is that the newsboys' shouting is particularly loud voice the racy and vulgar stories that appear even in the last detail, in the less reputable papers.

## Fuel In Driving Tests

A greater number of women than men motorists have failed to pass the new official driving tests in Great Britain. A special report showing the percentage of the women "ploughed" by the Ministry of Transport examiners since the tests began has just been made public.

## No Test Needed

American paper money will fold five thousand times by breaking test, without cracking or bruising. There is no need for any such test in Canada, where it is so common to hold on to paper money for more than one folding says the Ottawa Citizen.

## Pens And Penmanship

Steel Pen Invented Early In The 19th Century

The change that has come over pens and penmanship, letter-writing and bookkeeping, the whole art of correspondence, in the last half century is an illustration of our development in speed and consequent change of practice. We have gained much, although we have lost something. What we have certainly lost behind us is the wondrous variety of characteristic calligraphy, often difficult to decipher, that was carried by the pen.

The earliest writing instruments were the brush of the Chinese and the Egyptians and the stylus of the Greeks and the Romans. The origin of the quill for writing is uncertain, but it was for many centuries the chief writing instrument, holding its own until the middle of the last century. Fifty or sixty years ago, a judge on the bench might still be seen scratching his notes with a goose quill, and many men, clinging to habit, wrote their correspondence that way.

The steel pen was invented early in the 19th century and took the place of the quill. It made style somewhat more uniform and its vogue rapidly, despite the influence of the typewriter. Many leading men in Canada, including the prime minister, have used a steel pen and that is still considered the ultimate of courtesy in letter-writing. The stylus—writing pen—made in steel, it has been replaced by the fountain pen, a handy instrument, although it is not so satisfactory as the quill, the highest art in penmanship or decorative writing.

There are over half a million fountain pens made in Canada in a year and the factory value of other pens is over \$800,000. Our importations are considerable but the domestic production is far in excess.

This information is taken from reports issued by the General Manufacturers Branch of the Dominion Bureau of Statistics.

## Gardening Favorite Hobby

Biographies Of Women Show It Tops The List

Dr. H. C. Connell, who has announced discovery of biological products he named "essence" for treatment in cancer, said he was greatly encouraged over results so far achieved. He has been working steadily on detailed reports for publication in scientific and medical journals, with the assistance of a pathologist. He has also been studying the cause of cancer.

Marked improvement has been shown by patients under Dr. Connell's care, even after 10 days' treatment. Requests for treatment, from as far away as Texas, continue to come in.

Dr. Connell has found injection of the "essence" solution into the bloodstream arrests cancer growth. He hopes the treatment may prove definitely to control cancer.

## Italy's Wheat-Mixing Law

Has Out From Imports Of Grain From Canada

Imports of Canadian wheat into Italy are restricted, not only by relatively high customs duties, but also by the application of the wheat-mixing law. The latter, as at present effective, compels Italian millers to grind 90 per cent. of both hard and soft Italian wheat, thus leaving only one per cent. foreign wheat in the finished product. In spite of these difficulties, Canada exported 24,513 metric tons of hard, 44,523 metric tons of soft wheat, and 15,594 quintals (220 pounds per quintal) of wheat flour to Italy in 1934.

## Too Much Waiting

Young People All Not Creating Opportunities As They Should

Students of Canadian history have been impressed of late by the thought that many present difficulties would disappear if young people were prepared to face pioneer conditions and make a way for themselves as earlier generations did in this country. There is too great a tendency to wait for governments or organizations to create favorable opportunities, and too much dependence upon services and conveniences and environment which exists only because of the toll which others performed many years ago.

Mercury is the fastest of all the planets in the solar system and revolves about the sun at approximately 18 miles a second. The earth travels 18 miles a second in its journey around the sun.

There are no new plans left in the world to discover, famous as it is, that it has been wandering for so long it was so hard to find a fresh spot for a picnic.

## A Remarkable Display

Perfect Organization Made Royal Air Force Review Impressive

The recent review of the Royal Air Force by the King was one of the most remarkable pieces of organization ever achieved by man.

Three hundred and fifty machines were reviewed on the ground. When the King had looked over the first 182 and while he was still looking over the remainder, these 182 began to take to the air, and they came from heavy bombers to fast fighters. It took two hours to get the 182 into the air where they circled around until such time as the King should reach a reviewing stand at 35 miles away. Yet so precise was the working out of the schedule that on the split second when the King took his place the first of the great armada of the air appeared above.

When it is remembered that the speeds of the planes varied from 100 miles an hour to 250, and that variation of wind had to be taken into account, the exactitude of the review was astonishing. Different types of machines streaked across the sky, and half way through the program a stunt group of nine machines intervened with an amazing display of evolutions.

The orders of the commander in the leading plane being heard by the 150,000 spectators through loudspeakers on the ground. After the rest of the machines had followed they formed in rear of the others in a long "V" shape. It was a long way past the field, then the entire 182 came roaring back to one man like a covey of quail, in succession as they came abreast of the royal stand. The whole aerial review took 35 minutes and ended at 4:15 p.m.—Sitt Thomas Times-Journal.

## Encouraging Results

Discoverer Of Cancer Treatment May Result In Cancer Control

Dr. H. C. Connell, who has announced discovery of biological products he named "essence" for treatment in cancer, said he was greatly encouraged over results so far achieved. He has been working steadily on detailed reports for publication in scientific and medical journals, with the assistance of a pathologist. He has also been studying the cause of cancer.

Marked improvement has been shown by patients under Dr. Connell's care, even after 10 days' treatment. Requests for treatment, from as far away as Texas, continue to come in.

Dr. Connell has found injection of the "essence" solution into the bloodstream arrests cancer growth. He hopes the treatment may prove definitely to control cancer.

## Little Of Truth

A school inspector began by putting a few questions. To the small girls.

"Now," he said, "all the good people were white, and all the bad people were black, what color would you be?"

Some of the children said white and others black, but little Gloria, who had remained silent until the others replied, said, "Please, sir, be strictly."

Many stars are hotter than our sun.

## Household Arts

## PATENT 5132

Now is the time to stock up on such things as bedspreads. And how effectively you can do this with the lovely basket design. It's made in the simplest stitches and grows quickly under your needles. Do it in the colors that will harmonize with your bedroom whether it's dainty or bold in color. If you wish, wear and other lines to go with it, you will find matching in Pattern 5132 which appeared some time ago.

In pattern 5132 you will find a transfer pattern of a basket 15 1/2 x 18 inches, a basket 15 1/2 x 18 inches, and four corner bands 4 1/2 x 6 1/2 inches. Material required: color suggestions, and illustrations of all stitches used.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg News Service, Ltd., 175 McDermott Ave., Winnipeg.

There is no Alice Brooks pattern book published

## Recipes For This Week

(By Betty Barclay)

### PECAN CHOCOLATE MOUSSE

2 squares unsweetened chocolate  
1 1/2 cups cold milk  
4 egg yolks  
1 package strawberry-flavored gelatin  
4 teaspoon salt  
1/2 teaspoon vanilla  
1/2 cup pecan meats, coarsely cut  
1 cup cream, whipped

Add chocolate to milk and heat to a boil. When chocolate is melted, heat with rotary egg beater until mixture is smooth and blended.

Whisk egg yolks to a stiff foam, add small amount of chocolate mixture, stirring vigorously; return to double boiler and cook until thickened, stirring constantly.

Physicians were momentarily at a loss to explain his trouble when he fell into a coma after gulping that he couldn't breathe.

For the 27 weeks ended July 4, 1935, the number of hogs graded in Canada was 1,595,292, of which 537,716 were graded alive at stockyards; 1,057,576 alive at packing plants; and 37,254 by carcass.

A filter which transmits "cold light," virtually without heat, has been developed.

## BLACKBERRY JAM

4 cups (2 lbs.) prepared fruit  
7 cups (3 lbs.) sugar  
1/2 cup lemon juice  
To prepare fruit, grind about two quarts fully ripe berries or crushed completely one layer at a time so that each berry is reduced to a pulp. Measure sugar and prepared fruit into large kettle, mix well, and bring to a full rolling boil over medium fire. Stir constantly before and while boiling. Boil hard 3 minutes. Remove from fire and stir in bottled fruit pectin. Then stir and skim by turns for just 5 minutes and cook slightly to prevent breaking fruit. Pour quickly. Pour into hot jars at once. Makes about 20 glasses (8 fluid ounces each).

## Making Use Of Pines

More Than Hundred Kinds Run By Russian Industries

Industry in Soviet Russia is keeping 130 airplanes busy. They serve factories, construction jobs, oil fields and mines, transporting mail, passengers and carrying experts in emergencies. Pines are widely used by the oil trusts in geological prospecting and by the power industry to determine points where high-tension overhead lines have been damaged.

## Keep Gardeners

It would be difficult to say which is the better gardener—the Prince of Wales or the Duchess of York. Perhaps the Prince's enthusiasm is the greater, for gardening is a new hobby to him. The Duchess has been a devotee of home gardens that took to her earliest childhood.

Pinchold holds the honor of the earliest use of handwork as an agency in education.

## Little Journeys In Science

ACIDS

(By Gordon H. Quast, M.A.)

Acids are important pieces of hydrogen compounds, which when dissolved in water form a sour taste. They also have the property of turning blue litmus, a dye extracted from certain lichens, red. A substance is known as an acid, which undergoes a change in color upon the addition of an alkali, is known in science as an indicator. Thus litmus is red in the presence of an acid and blue in the presence of an alkali.

The most common acids are sulfuric, hydrochloric, nitric, carbonic, and acetic. Acetic acid is the active part of vinegar, which has been used by man for thousands of years. Apples, lemons, grapefruit and other fruits owe their agreeable flavor, in part, to acids, such as malic, citric, and tartaric. Acids always contain the element hydrogen and often oxygen.

Hydrochloric acid gas may be prepared by heating strong sulfuric acid upon salt. It is a very soluble gas, and the solution is known as hydrochloric acid. This acid is used for the preparation of hydrogen and chlorine and for cleaning the surfaces of metals.

Carbonic acid, or carbonic acid, or of vitriol, contains about 90 per cent. of water. When the strong acid is poured into water, the quantity of heat is generated. Concentrated sulphuric acid has great affinity for water, or for the elements of air, and when mixed with water, it gives off a great quantity of heat, which is sufficient to cause the water to boil. The concentrated acid, for example, is a chemical compound composed of the elements carbon, hydrogen, and oxygen in chemical union. It is a weak acid, which decomposes very readily, it plays an important part in the manufacture of explosives and fertilizers.

Carbonic acid is produced by bubbling carbon dioxide gas into water and is found in natural waters. Although it is a weak acid, which decomposes very readily, it plays an important part in the manufacture of explosives and fertilizers.

Carbonic acid is produced by bubbling carbon dioxide gas into water and is found in natural waters. Although it is a weak acid, which decomposes very readily, it plays an important part in the manufacture of explosives and fertilizers.

## Earth May Blow Up

Surrounding Shell Being Gradually Destroyed

Old Dr. Bailey Willis, 76, of Palo Alto, who loves to make the wit out of "seismophonic" Southern California, has a theory that the structure of the Earth's history and structure which dislocated many a long-range imagination. The Earth, Dr. Willis suggests, is a globe of molten material, and is constantly being pulled into a tight little planetary ball by the forces of attraction between the two billion years ago. Ever since, radioactive elements in Earth's material have been driving energy toward the center until today the core of Earth is a hot fluid mass of iron, nickel, and other heavy elements.

Surrounding the rocky shell 2,000 miles thick. As time passes, "the persistent release of atomic forces continues, and will continue to supply heat and melt the surrounding shell with the result that Mother Earth may eventually lose her place among the stars."

Seeking a logical reason for the frequency of earthquakes along the shores of the Pacific, Dr. Beno Gutenberg of Pasadena presented a theory that the Pacific Ocean represents a vast area from which Earth has lost 20 miles of outside skin. That "raw spot" in Mother Earth's side promises to explain the true nature of Earth's disturbances, the "crust" movements appearing to extend along the edges of the continents.

Industry in Soviet Russia is keeping 130 airplanes busy. They serve factories, construction jobs, oil fields and mines, transporting mail, passengers and carrying experts in emergencies. Pines are widely used by the oil trusts in geological prospecting and by the power industry to determine points where high-tension overhead lines have been damaged.

Lewis Galfrey of Calgary is at present visiting here. The last of Mr. and Mrs. L. Cahoon.

It was 21 years ago last Sunday that Great Britain declared war on Germany.

Miss Ruth Pow is at present holidaying at Elkwater Lake the guest of Mrs. Colard.

Mrs. A. Dubois and son are spending this week at Elkwater Lake.

Miss Jean Pow returned home last week-end from Lethbridge where she has been visiting friends.

Miss Dorothy Forbes, of Drumheller, is at present visiting Miss Marjorie Fairhurst.

Mrs. H. Johnson returned home last Monday after visiting her daughter at Mirror Alta.

Miss Irene Berchholz was taken to the hospital last Thursday suffering from blood poisoning. She is now progressing favorably.

Miss Marion Dunnett of Lethbridge formerly of Redcliff, spent a few days in town this week the guest of Miss Buchanan.

While playing with other children last Tuesday Miss Katie Luna had the misfortune to fall and break her left arm. Dr. Ward set the fracture.

Jean, John and Tom Scott, of Regina, who are on a motor trip to the mountains, stopped off here last Sunday to visit their mother and Mrs. Tom Palmer.

Mr. C. A. Benjamin had a narrow escape from a bad car accident while driving in from the country last week-end. His car ran into the ditch and turned over. One passenger was badly bruised about the neck and shoulders and Mr. Benjamin escaped with a bad shaking up.

Ladies and Gentlemen—

Having accepted the nomination as standard bearer for the Conservative party for the provincial constituency of Medicine Hat of which Redcliff is a part agreed to the voters for their support, not on an endless list of promises to solve all the problems from the cock-kicking over the milk pail to the baby catching the measles as my opponents are doing, but rather on a well proven, common sense, honest-to-goodness business administration, should our party be returned to power.

I feel convinced that having been Mayor of Medicine Hat for the past ten years I have gained sufficient knowledge of the needs of this part of the province as a manufacturing centre, to be of some service to you in bringing these matters before the legislature and endeavoring to secure the passing of legislation which will tend to improve conditions in this district.

As a Conservative candidate I believe the principal leader of my party, Mr. Duggan, has the most sound and sane policy for the province of Alberta and for getting it out of the unfortunate and unfavorable position in which it now stands as a result of mismanagement under both Liberal and U.F.A. rule. At the same time I have made it quite clear

Mr. H. Leppard and family are at present holidaying at Elkwater Lake.

Mr. and Mrs. F. Kollett left this week for Waterton Lakes where they will spend their holidays.

Mr. and Mrs. R. Romney and son spent last week-end in town the guests of Mr. and Mrs. Martin and Mr. and Mrs. Shaw.

In health since going to Vancouver, Mr. and Mrs. H. Chas. are at present on a holiday trip to California.

Mrs. J. W. Wyatt and family are at present holidaying at Elkwater Lake.

Mrs. Sanderson of the Medicine Hat hospital staff, is spending her holidays here with her parents.

The executive of the Conservative association of Redcliff is firmly convinced that the

**To The Electors of Redcliff And Surrounding District****I. BULLIVANT**

Mayor of Medicine Hat and Conservative Candidate in this Constituency.

I will not allow myself to be tied to the apron strings of any group or leader but rather will exercise my own judgement on all questions and will support any measure introduced by any party which in my opinion is in the best interests of the province of Alberta as a whole.

I sincerely solicit your votes and influence.

Yours Sincerely  
I. Bullivant

Industries, the merchants and the rank and file of our citizens will be best represented in the legislature by Mr. I. Bullivant, the Conservative candidate, and therefore, solicit your support for him in the approaching provincial election.

Mr. Bullivant has been in public life for the past 10 years as mayor of Medicine Hat. His business ability as head of the council, his fearless attitude together with the courage of his convictions and his refusal to be stampeded by any clique or interests has won for him the election against all comers for five different occasions.

By strict economy and careful attention to the business of the city and with-out any new funded untried experiment, Medicine Hat council under Mayor Bullivant, has placed Medicine Hat in the forefront among the cities of western Canada from a sound financial standpoint, and today Medicine Hat bonds are looked upon as one of the best buys on the market.

It is just this kind of business ability which is needed in the government of Alberta today and Mr. Bullivant is the one candidate who can fill the bill.

Vote for Bullivant and help get Alberta on its feet.

Redcliff Conservative Association

Her many friends in town will be glad to learn that Mrs. R. S. Hodge has greatly improved.

Mr. and Mrs. Woodley and children, of Broadacre, Sask. are at present visiting Mr. and Mrs. A. E. Sanderson.
